1. INCIDENT NAME  
**Heavy Rainfall / Potential Flooding**

2. DATE  
**07/14/2025**

3. TIME  
**1:00 PM**

4. EOC ACTIVATION LEVEL  
**Level 3 – Enhanced Monitoring**

5. LOCAL STATE OF EMERGENCY DECLARED?  
**No**

6. PREPARED BY  
**EOC Planning Section**

#### CURRENT SITUATION

A developing area of low pressure moving westward over the State of Florida, combined with increased tropical moisture is expected to bring up to 4" – 6" of rainfall across Pinellas County over the next five days.

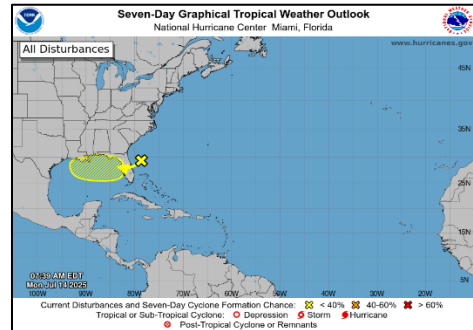

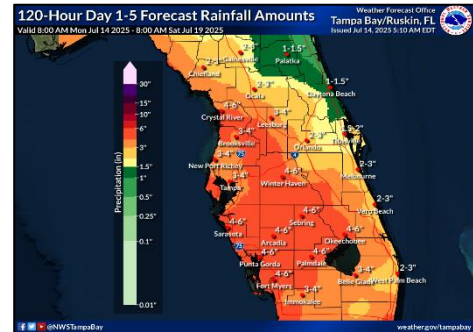

The National Hurricane Center (NHC) has given this area a 30% chance of developing into a tropical depression within the next seven days.

The Weather Prediction Center (WPC) has placed Pinellas County in a Slight Risk (Level 2 / 4) for excessive rainfall and flash flooding today (07/14) through early Wednesday (07/16).

Additionally, the Storm Prediction Center (SPC) has placed Pinellas County in a Marginal Risk (Level 1 / 5) for severe weather today, with the primary threat being damaging wind gusts.

***Pinellas County Emergency Management (PCEM) recommends everyone review emergency plans and share forecast information/messaging with residents, partners, and their communities.***

#### GRAPHICS

#### IMPACTS

- 4" – 6" of rainfall with isolated higher amounts will be possible across Pinellas County through the next five days (07/14 – 07/19), with most of the rain falling today (07/14) through Wednesday (07/16).
- Isolated to scattered flooding (including localized flash flooding) will be possible during periods of very heavy rain, especially in areas with poor drainage.
- An isolated severe thunderstorm with gusty winds in excess of 60 MPH will be possible today (07/14).
- ***Even if the system develops into a Tropical Depression near Florida, it is forecast to move away from Pinellas County towards Louisiana and/or Texas.***

#### COUNTY ACTIVITIES

- The Emergency Operations Center (EOC) is at Level 3 – Enhanced Monitoring.
- PCEM is monitoring the situation and forecasts in coordination with the National Weather Service.
- Pinellas County Public Works (PCPW) – Floodplain Management is assessing rainfall forecasts, infrastructure inspections and the need for lowering of lakes, and the potential for flooding impacts
- PCEM and Pinellas County Communications (PCC) are coordinating public messaging efforts.
- This will be the only Situation Report on this incident unless significant changes or conditions occur.

#### RECOMMENDED ACTIONS

- Share weather forecasts and protective measure actions with your partners and communities.
- Review emergency plans and supplies.
- Have multiple ways to receive weather warnings such as Alert Pinellas or Weather Radios.
- Monitor weather reports and forecasts regularly:
  - a. [weather.gov/tampa](http://weather.gov/tampa), [wpc.ncep.noaa.gov](http://wpc.ncep.noaa.gov), [spc.noaa.gov](http://spc.noaa.gov), and [nhc.noaa.gov](http://nhc.noaa.gov)
- Monitor Pinellas County Social Media Sites:
  - a. [x.com/PinellasEM](https://x.com/PinellasEM) and [pinellas.gov/social-networking](http://pinellas.gov/social-networking)
- Public Information Resources
  - a. [ready.gov/floods](http://ready.gov/floods) and [disaster.pinellas.gov](http://disaster.pinellas.gov)
